Does the Work Right with Much Less Labor

Bolens Power Hoe Outfit No. 2 with two No. 100 Cultivator Frames, one equipped with cultivator teeth, the other with 6-inch hoes. Price \$194.40 F. O. B. Factory.

simple and effective tool control enables the operator to follow straight or crooked rows with tools set close to the plants and do the most accurate work at a uniform depth.

Whether you live in town or country, you can make splendid use of the

BOLENS POWER HOE and Lawn Mower Tractor

The differential drive allows the tractor to be turned at the ends of rows in a small space, without dragging either wheel. The handles are offset so that the operator walks between the rows in a natural position, while the tractor works astride the row. (The BOLENS may also be used between rows twenty-four inches apart or wider).

All BOLENS attachments are instantly interchangeable, snap hitches making it possible to quickly remove or attach seeders, any one of several cultivator frames, equipped for different kinds of work, or a lawn mower. Not even a wrench is required. The tool shank blocks are adjustable, so that you can set the tool at any desired angle.

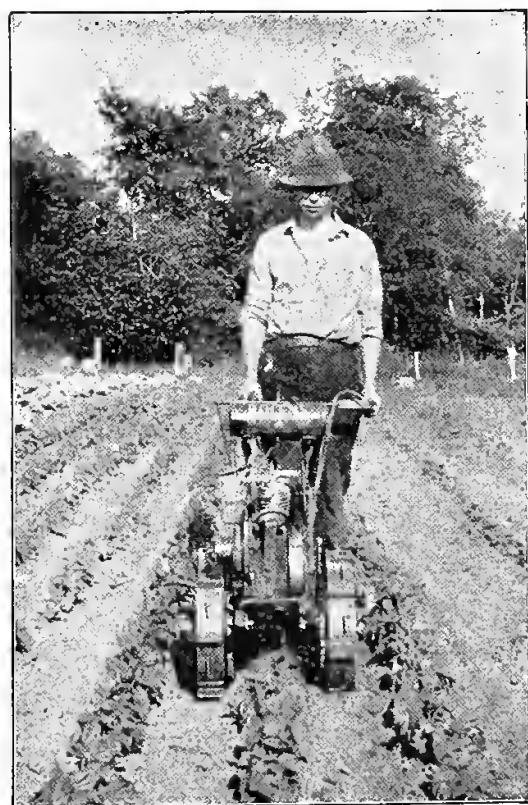

See the BOLENS Power Hoe and tool equipment at our store, or write for complete catalog.

Cultivating the home garden with the BOLENS. Delightful recreation.

Here is a tool with the "Pep" and "Go" that will delight any man looking for quick and thorough results. It seeds, it weeds, it cultivates, it mows the lawn. It will do many times more than the man with the hoe, or hand mower. A quarter's worth of gas and oil will often do a day's work.

The BOLENS is a motorized wheel hoe, eighteen inches wide. It has a patented arched axle for straddling the plants and will work in rows twelve inches apart or wider. A wonderfully

inches apart or wider. A wonderfully

Cultivating String Beans
BOLENS Experimental Farms

The BOLENS is quickly convertible into a power lawn mower. The cultivator frame is unsnapped. Smooth bands are slipped over the wheels and the tongue which is attached to the lawn mower is snapped in place. The outfit is easily guided and does a clean job in all the nooks and corners like a hand mower. If you have a good cutting unit you can fit it to this attachment.

What Users' Say:—

Mr. Fritz Bahr, Florist and Nurseryman of Highland Park, Illinois—"There isn't anything we have bought of late which turned out a better investment than the BOLENS Power Hoe."

Mr. Henry Leuning, Superintendent, Shade Tree Commission, Ridgewood, New Jersey—"We wish to express our entire satisfaction with the BOLENS Power Hoe, which we are using for cutting the lawns on our village parkways and cultivating the stock at the Shade Tree Commissions Nurseries."

Mr. A. L. Tanner, Market grower, Bay Village, Ohio—"My BOLENS Power Hoe does the work of six hand cultivators. My push hoes and other implements of the past are rusting from lack of use."

Mr. Geo. F. Grewe, Onion grower, Des Plaines, Illinois, writes—"We have one of your BOLENS Power Hoes and my fourteen year old son handles it easily. It has given splendid satisfaction."

These views show a few of the many kinds of work which the BOLENS will do at a saving
